## NATURAZ IL 208

Isoamyl Laurate  
CAS No.: 6309-51-9

**Naturaz IL 208** is experience a lightweight emollient designed to deliver a soft, silky touch on the skin. Its low-viscosity texture ensures effortless spreadability and quick absorption, leaving behind a smooth, non-greasy finish.

**Naturaz IL 208** sourced from 100% vegetable origin, it is fully biodegradable and environmentally responsible for making it an ideal choice for modern, conscious formulations. Acting as a natural alternative to silicone, it provides a luxurious, silky feel without the oily residue. Also, have good pigment wetting ability and UV filter solubility.

### Benefits

- Lightweight
- Fast absorption
- Smooth and non-greasy feel
- Improve pigment solubility and UV filter solubility.

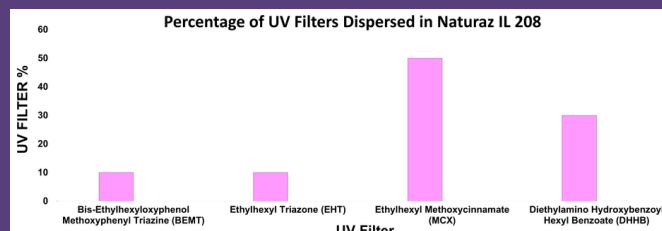

### Application

- Colour Cosmetics
- Skin Care
- Sun care

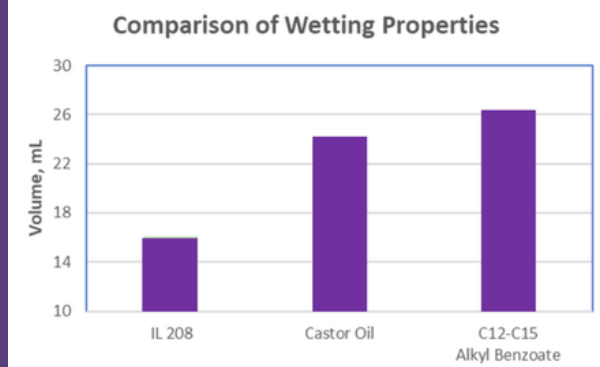

Halal Compliance

China Registered

This graph shows the maximum percentage of UV filters that can be stably dispersed in Naturaz IL 208 without crystallization and exhibit good compatibility.

Each volume of emollients were used to disperse 10 gram of TiO<sub>2</sub> to a smooth texture
