NATURAZ PH 233

PROPYLENE GLCOL DIHEPTANOATE

CAS No. : 56519-68-7

Naturaz PH 233 is an ultra-light emollient with a silicone-like sensorial profile, delivering a soft, powdery after-feel. It offers excellent spreadability, rapid absorption, and enhances skin comfort. Also functions as an efficient solubilizer for UV filters and good colour dispersion.

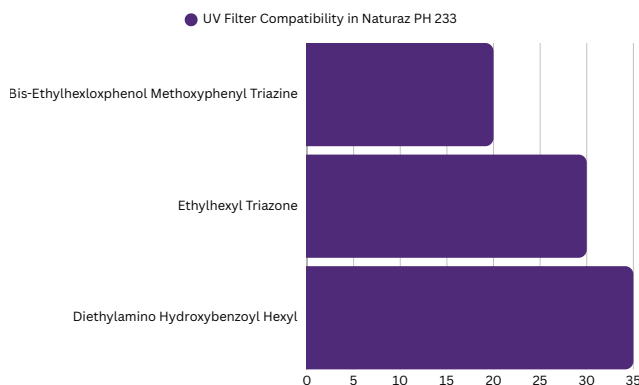

Benefits

- Silicone alternative
- Powdery after feel
- Fast absorption and good spreadability
- Good UV filter solubiliser and colour dispersion

Application

- Sun care
- Skin care
- Colour cosmetic
- Hair Care

UV Filter Solubility

Guided Formulation: Lip Oil

Phase	Ingredient	INCI	Function	%W/W
A	Reflez DD 20	Dimer Dilinoleyl Dimer Dilinoleate	Film Former	20
	Beeswax	Beeswax	Thickener	3
	Shea Butter Super Refined	Butyrospermum Parkii (Shea) Butter	Moisturising Agent	10
	Naturaz PP 217	Polyglyceryl-3 Polyricinoleate	Stabiliser	10
B	Red 28 AI-C-TTB2	Red 28 Lake (and) Triethoxycaprylylsilane	Colourant	0.3
	Naturaz PH 233	Propylene Glycol Diheptanoate	Dispersing Agent	up to 100

Procedure:

Add Phase A one by one in main vessel. Premix Phase B in separate beaker, mix well until all homogenous. Add Phase B into A. Heat up to 75°C to 80°C, then mix well until all dissolved. Pour into container.
